How To Play Ice Fishing Game: Ice Fishing real money round on a phone: a big red fish hauled up on a bent rod over the snow, the phone resting on frozen lake ice under a night sky

How one round works

1. Bet while the timer runs. Chips go on Leaf 1 or Leaf 2, on one fish (Lil' Blues, Big Oranges or Huge Reds), or on All Bonuses — one chip for each of the three fish.
2. Boosts drop on the wheel. Random Leaf segments get a 3x–10x multiplier; in some rounds every segment of one fish type gets 2x–10x.
3. The wheel spins. Fifty-three segments: 23 Leaf 1, 23 Leaf 2, 4 Lil' Blues, 2 Big Oranges, 1 Huge Reds.
4. A Leaf segment settles at once. Chips on that Leaf win 1:1, or the segment's boost if it carries one.
5. A fish segment starts the fishing round. Fish rise with multipliers, one is caught, and chips on that fish are paid by its multiplier times any boost.

At a glance

bet	lands on	pays	RTP
Leaf 1	23 of 53 segments	1:1; boosted 3x–10x pays 2:1 to 9:1	97.10%
Leaf 2	23 of 53	same as Leaf 1	97.10%
Lil' Blues	4 of 53	caught fish up to 100x, times a boost of 2x–10x	95.69%
Big Oranges	2 of 53	caught fish up to 200x, times a boost	95.60%
Huge Reds	1 of 53	caught fish up to 500x, times a boost	95.17%

Questions people ask

What does All Bonuses mean? One chip goes on each of the three fish bonuses at once, so any fishing round pays you.

Do I need to do anything in the fishing round? No. The fish is caught by the show; your chip is settled automatically.

Can I bet on Leaf 1 and Leaf 2 together? Yes. On a plain Leaf segment one chip wins 1:1 and the other loses, so you break even; a boost makes it a win, and a fish segment takes both.

Which bet is best for beginners? Leaf 1 or Leaf 2 — the highest RTP and a result on every spin.
